

# THE MAGIC OF LEARNING

Where do  come from?

What makes  shine at night?

Where does a  get its colors?

How do  make their light?

Do rivers flow to oceans?

Do mountains touch the  ?

Why do  bloom in springtime?

Why does thunder sound so loud?

Refrain:

Let's discover, let's observe

Let's ask questions and let's learn!

We'll find answers in  and learn where to look

Let's discover the world around us.

Where can we find all the answers?

How do we know where to go?

We can ask our parents and teachers

They can help us learn things to know!

Refrain:

Let's discover, let's observe

Let's ask questions and let's learn!

We'll find answers in  and learn where to look

Let's discover the world around us!
