

## ***Measuring and Baking***

I-I love to bake all sorts of delicious treats,  
in the kitchen with mom or with dad it's so sweet,  
but before I can bake I tie my apron strings  
and I learn how to measure with measuring things,

There's a full cup, a half cup, and quarter cup too,  
They are all different sizes for measuring food.

You can add in some flour and sugar and spice  
Fill the right cup and know that you must be precise!

When you need to add dry things in smaller amounts,

A-a tablespoon or a teaspoon is what counts.  
Baking soda and salt are just some of the things,  
You can measure with these little spoons on a ring.

For the liquids we measure with ounces instead,  
Ingredients like oil and milk to make bread.

We-e pour all these liquids until mom says stop,

Be-e careful or you will spill over the top.

When we've carefully measured and worked towards our goal,

The ingredients are mixed inside a big bowl.

Put it into the oven, (set) the timer just right,  
and soon we have baked a new yummy delight.
